

MK FRAUD READINESS

Board readout

Comprehensive evidence review · Kestrel Industrial Supply (Pty) Ltd

Decision context

Approve the Financial Controller mandate for detection ownership and evidence-led oversight.

Where we stand

The deterministic readiness result remains unchanged by reviewer narrative. The evidence review determines how confidently management and the board can rely on the recorded position.

What could happen

The scenarios below are plausible, organisation-specific pathways linked to the recorded control and exposure universe. They are not allegations.

Supplier bank-detail redirection

A stale or excessive account remains active. An unauthorised change is made and the audit trail is obscured or discovered late.

Impact: Unauthorised payments or value leakage. · Warning: Overdue access exceptions; Unusual change outside role pattern

Privileged access misuse

A pattern changes after the last rule review. Activity continues below or outside stale thresholds until a manual review identifies it.

Impact: Losses accumulate before detection. · Warning: Rising false negatives; Unreviewed high-risk rules

Detection-rule evasion

A higher-risk role receives outdated or no role-specific guidance. A warning sign is not escalated or recorded promptly.

Impact: Preventable losses continue. · Warning: Untrained high-risk roles; Repeated reporting errors
